# Computation In Neurons And Neural Systems

**neurons and neural computation - mit** - 9.00 introduction to psychology prof. s. pinker week 4, lecture 2: neural computation 3 feature detectors neural computation • computing logical functions with neurons.  
**computation in a single neuron: hodgkin and huxley revisited** - computation in a single neuron 1717 whether we think of inputs as arriving at the synapses or being driven by sensory signals outside the brain— is vast, individual neurons are sensitive **neurons, dynamics and computation** - neurons, dynamics and computation brains have long been regarded as biological computers. but how do these collections of neurons perform computations? **computation and analysis of excitatory synapse and ...** - form communication links between neurons and are responsible for computation and transfer of electrical signals through chemical interactions from pre-synaptic neuron to the post-synaptic neuron [3]. **computation with spiking neurons - inference** - computation with spiking neurons sebastian a. wills clare college cambridge a dissertation submitted in candidature for the degree of doctor of philosophy, **computation in networks of neurons in the brain** - content 1. theoretical results on the computational power of networks of spiking neurons 2. features of bnnns that may provide clues about the way how they compute **neurons graded computational - pns** - the computation that the set of neurons is performing. a model therefore must describe how the state evolves in time, and the original model describes this in terms of fast stochastic evolution. each neuron samples its input at random times. it changes the value of its output or leaves it fixed according to a threshold rule with thresholds  $u_i$ . **viv ife tivj+i, u' .iji ... silicon neurons that compute - uwaterloo** - silicon neurons that compute 125 fig.2. neurogrid. spiking neural networks with up to 16 layers, each with up to 256x256 neurons, are modeled with sixteen 12x14 sq-mm neurocores (left) assembled **computation in a single neuron: hodgkin and huxley revisited** - 1 introduction on short timescales, one can conceive of a single neuron as a computational device that maps inputs at its synapses into a sequence of action potentials or spikes.
